

WESNET's SafetyNet Australia project presents

Technology Safety Summit

6-7 September 2018 Gold Coast, Australia

We are so pleased to announce that the 3rd Annual Technology Safety Summit will take place on 6-7 September in the Gold Coast this year! The Summit continues our commitment to increase the knowledge and capacity of front-line practitioners on technology-facilitated abuse. In addition to our amazing team, we'll have national and international experts present and share the latest on technology, abuse, and prevention.

The two-day Technology Safety Summit is for anyone interested in the intersection between technology and violence against women and on issues related to technology, privacy, security, women, and safety.

This year, we will also host a one-day pre-Summit training specifically for law enforcement on 5 September 2018. Teaching this day-long event will be international and national experts on law enforcement, laws, and technology.

Attendees will have the opportunity to engage and build relationships across relevant sectors, supporting knowledge sharing and collaboration to address technology-facilitated abuse.
